EDUCATION

- JAIN (Deemed-to-be University)** Bangalore, India
Masters in Computer Applications - Artificial Intelligence and Machine Learning 2024 - 2026
- St. Joseph's College of Arts and Science (Autonomous)** Cuddalore, India
Bachelor of Computer Applications 2021 - 2024

SKILLS SUMMARY

- Core AI/ML:** Machine Learning, Deep Learning (CNN, RNN, Transformers), NLP (BERT, GPT), Data Analysis, Data Cleaning, EDA, Feature Engineering, Model Evaluation
- Languages:** Python, SQL, Java, JavaScript, HTML5, CSS3
- Frameworks:** TensorFlow, PyTorch, Scikit-learn, Flask, FastAPI, React.js
- Tools:** Pandas, NumPy, Docker, PostgreSQL, Supabase, Git, GitHub, Postman, Render, AWS
- Concepts:** REST APIs, ETL Concepts, CI/CD Pipelines, Data Pipelines, Generative AI, LLMs

EXPERIENCE

- Innovate Intern** Remote
AI/ML Intern Jun 2025 - Jul 2025
- Lenovo India Pvt. Ltd.** Puducherry
In-Plant Trainee May 2023 - Jun 2023

PROJECTS

- Cyber Forensics AI – Neural Attack Reconstruction (VAE-GAN — FastAPI — Docker):** Built generative AI framework using VAE-GAN to reconstruct missing cyber attack logs and improve attack traceability. Developed FastAPI backend for real-time inference and confidence scoring. Optimized model deployment using Docker achieving scalable execution and reduced inference latency by 30%. Achieved 43% reduction in key generation latency and 44% lower RAM utilization using optimized CRYSTALS-Kyber-512 framework.
- AI Text Humanizer (LangChain — GPT-4o — Flask — Supabase):** Built RAG-based AI text humanization platform using GPT-4o and LangChain. Improved text naturalness by 35% through evaluation-driven optimization. Developed Flask + Supabase backend with authentication and session handling. Optimized API architecture achieving response latency below 200 ms under concurrent requests.
- Stock Price Analyzer (LSTM — Flask — React):** Developed LSTM-based stock prediction system using historical market datasets (Yahoo Finance). Achieved approximately 62% directional prediction accuracy. Implemented preprocessing, visualization and feature engineering pipeline using Pandas, NumPy and Matplotlib. Deployed full-stack application using Flask + React.js.
- Enhanced Face and Eye Detection in Real-Time Using Haarcascades (OpenCV — Flask):** Built real-time face and eye detection system using Haarcascade classifiers achieving 95%+ detection accuracy. Optimized edge-device processing pipeline to sustain 30 FPS live inference. Improved robustness across varying lighting conditions and edge cases.
- Students Portal Website (Flask — PostgreSQL — REST APIs):** Developed role-based CRUD web application managing 2500+ student records. Designed relational database and improved query performance by 40%. Built REST APIs for dynamic rendering and optimized backend workflows for deployment and scalability.

PUBLICATIONS

- Multimodal AI: Transforming Business Decision-Making:** Published research in IJCRT (Vol.13, Issue 5, May 2025). Investigated multimodal AI architectures combining text, image, audio and video modalities for enterprise decision intelligence. Performed literature review, case studies and business impact analysis focusing on decision accuracy, AI adoption challenges and strategic business optimization.
- Quantum-Resistant Encryption for IoT Devices: Lightweight Post-Quantum Cryptographic Algorithms for Resource-Constrained Environments:** Published research in Journal of Technology (Vol.14, Issue 4, 2026). Designed lightweight PQC framework for IoT using IPSI metric and PAL middleware for constrained devices. Optimized CRYSTALS-Kyber-512 achieving 43% lower latency, 44% lower RAM usage and 41% reduced handshake bandwidth across ARM Cortex-M4 platforms.

CERTIFICATIONS

- Machine Learning Specialization - Coursera
- Application of AI for Anomaly Detection - NVIDIA
- Data Science and Analytics - HP LIFE
- OneEarth International Hackathon 2025
- AI Upskilling Certificate: Technical Foundations - Qualcomm
- CEH v12 - Packt
- AI/ML for Geodata Analysis - IIRS, ISRO
